Vision

Our planet powered by renewable energy.

About NRG Systems

NRG Systems is the global leader in wind and solar resource measurement and intelligence. Our hardware, software, and related services empower many of the world's largest developers to make informed decisions and improve efficiency at all stages of project development. With over 40 years of experience, NRG's heritage of innovation and deep understanding of data collection, management, and analysis drives the advancement of their signature turnkey solutions. A subsidiary of ESCO Technologies Inc. (NYSE: ESE), NRG Systems has offices in North America, Europe, and Asia and has shipped products to over 170 countries.

NRG Systems headquarters, Hinesburg, Vermont, USA

Wind and Solar Solutions

NRG Systems' wind and solar ecosystems are changing the way the industry manages data. Our resource measurement systems include meteorological tower-based wind and solar systems as well as Lidar-based systems designed to provide the high-quality data needed to plan and operate wind and solar projects across the globe. These turnkey systems are paired with our robust data management tools, suite of services, and superior technical support, for end-to-end solutions that drive successful project development from pre-construction through operation.
