

WINDCUBE® MONITORING SERVICE

System availability is critical to measurement campaign success. Rest assured that your remote sensing fleet is running smoothly all day, every day with NRG Systems' Windcube Monitoring Service. Our expert Technical Services team alerts Windcube owners and service providers within one business day if an operating issue is detected.

The following parameters are monitored daily:

- Confirmation of Successful Data Delivery
- Assessment of Data Availability
- Assessment of System Verticality
- Wind Speed Check

Key Benefits

- Maximizes system availability
- Supports data quality
- Allows users to scale Windcube fleets without having to develop internal monitoring protocols
- Available anywhere in the world
